

61  
--Court reporters charge revenue on a page by page, word by word or hourly basis, typically, when real time transcriptions systems are employed. The software and often the hardware underlying the CAT system are typically sold to the court reporter. The amount of revenue generated by the CAT system in exchange for the real time transcription functionality provided to attorneys and their clients typically far exceeds the cost of the underlying software and hardware. Considering the limited number of copies sold in view of the limited size of the market, revenue collection via sales of CAT systems has proved difficult to capture by any party other than the court reporters.--
